Second Report on Chiba City GIGA School Project – Systemic Child Exploitation and Data Transparency Failures

1. 問題概要 / Summary of the Issue

Chiba City continues to operate an educational ICT system that intentionally disables Google Workspace Vault audit logs, diverts all student activity logs into SkyMenu Cloud and CHAINS, and promotes Google branding to create a false sense of transparency. Approximately 8.3 billion yen (~$55 million USD) in public funds finance this infrastructure.

2. 技術的説明 / Technical Details

- No MX records or SPF/DKIM settings.
- Gmail is officially not used.
- Vault logs are never created.
- SkyMenu Vault is deliberately named to induce confusion with Google Vault.
- Logs are isolated in the CHAINS network.

3. 国際基準との乖離 / Departure from International Standards

- GDPR Article 5 principles of transparency and accountability are violated.
- COPPA obligations to protect minors' data are disregarded.

4. 追加の懸念と提言 / Additional Concerns and Recommendations

This represents systemic child data exploitation, intentional obstruction of audits, and erosion of public trust.

Recommendations:

- Immediate internal audit by Google.
- Public clarification of brand misuse.
- Investigation of vendor practices.

5. 添付資料 / Attachments

- Technical Explanation Document (JP/EN)
- Screenshots
- Official Responses

Sincerely,
